

Living in space

Grade 2 Science Worksheet

Humans *cannot* survive in space. Space ships must protect them and meet their needs.

Match each human need to the way astronauts meet it in space.

air •

water •

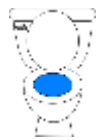

food •

shelter •

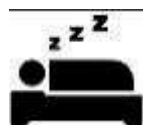

keeping
clean •

bathroom •

exercise •

sleep •

- Food is kept in sealed containers so it doesn't float away.
- Astronauts can wash with waterless soap and shampoo.
- Space toilets suck waste away to a tank.
- Sleeping bags are strapped down so they don't float.
- Space ships and space suits must carry air.
- Astronauts can run on special treadmills.
- Space ships carry little water. It must be recycled.
- Space ships and space suits protect astronauts from extreme heat and cold.

Answers

Match each human need to the way astronauts meet it in space.
